Summary

I'm Amitoj Singh Dhillon, an Electronics and Telecommunication Engineering student from Pune. I love building smart systems using Raspberry Pi, ESP32, and AI. My projects focus on solving real-world problems—like helping visually impaired people and tracking dementia patients—by combining hardware and software using C, Python, BLE, and MQTT.

Technical Skills

- **Languages:**C, Embedded C, Python
- **Microcontroller:**Arduino, Esp32
- **Embedded Tools:**Arduino IDE
- **Protocols:**UART, MQTT, I2C, GPIO
- **IoT Cloud:**Hive MQ

Projects

PiSight-Smart Object Detection

[linkdein.com](#)

- Build a smart wearable using Raspberry Pi Zero 2W to assist visually impaired users.
- Captured images via phone (IP webcam) and sent to a YOLOv8 server for object detection.
- Provide real-time voice feedback using a Bluetooth speaker and espeak.
- Tools and Technologies:Python, Raspberry pi, OpenCV, YOLOv8, Bluetooth, IP Webcam, espeak.

Experience

Embedded System Intern:Embedded Vision(alveofit),Indore

December 2024 – Jan 2025

- Worked on real-time distance tracking between Raspberry pi 02W and Esp32 using Bluetooth.
- Used RSSI Filtering to estimate proximity and detect movement.
- Gained hands on experience with putty, Arduino IDE, and UART communication and also focused on sensor data transmission.

Education

Dr.D.Y.Patil Institute of Engineering Managment and Research Akurdi, Pune

2022 – 2026

- Bachelor of engineering in Electronics and Telecommunication

Gayatri English Medium School and Junior College Moshi, Pune

2022

- Higher Secondary Certificate (HSC)

CMS English Medium Higher Secondary School

2020

- Secondary School Certificate

Certificates

- Basics of C programming by Great learning
- Python programming by Great learning
